Ashley Renne, Tech Expert, Environmental Activist and Co-Founder of Hot Jupiter

Experience the interactive Multimedia News Release here:https://www.multivu.com/players/English/8986751-cox-ashley-renne-internet-connection-tips/

BACKGROUND:

Did you know your internet experience could be slowed down if your wifi router is near a microwave, a fish tank, or mirror? Simple tips and tricks can maximize the speed and performance of your home network which, in turn can save you and your family time and money. Tech Expert Ashley Renne educated viewers on the ins and outs of internet speeds and how to fully utilize your connectivity. She also discussed how to measure speeds, the difference between download and upload and how to get the most from their home network.

HOW TO IMPROVE YOUR INTERNET SPEED:

- Speedtest.net is the most recognized third-party speed test. It's so easy. Download theOokla Speedtest app for your desktops and mobile devices or you can run from a web browser at www.speedtest.net.
- The amount of people sharing the connection also impacts speeds, but it's important to remember that most households can run MULTIPLE devices at one time seamlessly with 250 Mbps download speeds, where people spend most of their time.
- Know that your individual devices aren't capable of super-fast speeds. But the overall experience in your home is what matters.
