

Cox Communication's Multi-Gig Internet Speeds Lap T-Mobile's 5G Home Internet Ahead of The Big Race

Cox delivers 8x faster connectivity for fans in Las Vegas and across Cox markets

ATLANTA and LAS VEGAS, Nov. 14, 2024 – Cox Communications, the nation's fastest internet service provider (according to [highspeedinternet.com](https://www.highspeedinternet.com)), is driving top-gear internet experience to visitors and fans ahead of the big race this month. Cox's 2 gig download speeds clock in eight times faster than its competitor, T-Mobile 5G Home Internet.

Fastest Track Times

Like the world's fastest sport, Cox provides lightning-fast speeds to fans. The big race is taking place in Clark County, Nevada where Cox's high-speed network includes 11,000 miles of fiber optic cable. Hundreds of Cox's WiFi hotspots will be open to the public in Las Vegas during the race.

Why It Matters

Cox has invested more than \$12 billion in network upgrades over the past ten years. Cox's fiber-powered network allows Cox to offer multi-gig speeds across all markets.

Today, nearly 70% of Cox customers subscribe to speeds of 500 Mbps to 2 gig to support their home connectivity and entertainment needs. Multi-gig internet is a broadband connection that can transfer data at up to **2 billion bits per second**, twice as fast as traditional gigabit internet and **10 times faster than the average download speeds in the U.S.** (about 200 Mbps). That means basically everything fast and all at once:

- Seamless streaming experience
- Multiple video conferences at once
- Multi-player gaming
- Multiple 4k/8k streams
- Virtual reality, and more

Reaching New Speeds

“It’s been a big year for Las Vegas, serving as host to several major sporting events,” said Janet Uthman, Market Vice President, Las Vegas. “Our team has been there every step of the way, supporting host venues, neighboring hotels, businesses and residents in the market with high-speed, reliable internet ensuring they never miss a moment of the action.”
